

OFFICES AND LOGISTICS FACILITY

Hanover, PA

Client
Clarks Shoes, North America

Year Completed
2012

Project Size
550,000 SF

Provided owner representation throughout the design, documentation, and construction contract administration stages of this substantial undertaking. Provided design assistance, value-conscious documentation support, interior design services, and on-site construction evaluation to Clarks Shoes.

The global shoe manufacturer's North American distribution center features LEED Gold Certification and an automated robotic logistics and conveying system within the 550,000-SF, 70-foot clear-height facility.

This project was designed by a BH employee during employment with another firm.
